

Build #13747: CBMS Child Not Attending School

This project will update the data entry for indicating when a child has dropped out, been expelled or is not registered in school. These changes will streamline the process of data entry within the Attendance Details section of the Student Detail screen in CBMS.

⇒ A new “Not in School” drop down option will be added to the Enrolled Status field.

⇒ The Enrolled Status (1), Participation Level (2), and Participant Status (3) fields will be relocated to the top row of the Attendance Details section (see screenshots below).

Existing screen (zoom into image for more clarity):

Attendance Details

Enrolled Status ¹ Participation Level ²

Select Enrolled Status ... Select Participation Level ...

Attending school regularly

Yes No

Verification
